

Organizations call for a rejection of false solutions in light of the IPCC report

August 12, 2021

“

“Scientists in the latest IPCC physical science report provide undeniable proof of faster rates of global warming than earlier predictions indicated. The gravity of the climate emergency has been tirelessly called out by Indigenous and frontline communities for decades. We must pressure the IPCC before the mitigation report comes out early next year to listen to the voices of the traditional knowledge holders of Indigenous peoples and end carbon pricing, carbon capture and solar radiation management mitigation strategies that keep fossil fuels coming out of the ground.”

- TOM GOLDTOOTH
Executive Director of the Indigenous Environmental Network
Climate Justice Alliance Board member

CLIMATEJUSTICEALLIANCE.ORG @CJAOURPOWER CLIMATE JUSTICE ALLIANCE

Acknowledging the gravity of the IPCC report, global organizations and some based in the United States are calling on governments to reject false solutions to the climate crisis and invest in strategies that will rapidly reduce emissions.

Climate Justice Alliance Calls on the White House and Congress To Follow the Lead of Frontline Communities by Keeping Fossil Fuels in the Ground, Making the Necessary Investments to Combat the Climate Crisis, and Rejecting False Solutions

IPCC Report is Reality Check; But False Solutions Must be Rejected

Anne Petermann, Executive Director, GJEP, writes “Emphasis on ‘net zero’ in the report undermines the entire point the IPCC appears to be trying to make. Net Zero, which relies heavily on offsets, is a false solution aimed at prolonging business as usual and avoiding the real, transformative action we must collectively take.”
